US TECHNOLOGY PAPER ON 2nd APRIL AT SASTRA UNIVERSITY

A big hello to all UST aspirants!!!!

UST visited our campus(SASTRA UNIVERSITY , TANJORE) on 2 april 2007.. n i am glad to mention that i got placed in US TECHNOLOGY one of India's best IT companies with a thundering (80%) growth rate..n one of few companies which beleives in "EMOTIONAL BOND" between an employee and the company... with just 10% attrition rate even without BONDS.. This is a company which respects ethical values like"HUMILITY,HUMANITY,INTEGRITY ". This is one of few companies which practises "Flat Hierarchy".. n provides an ambient environment for both Personal and career growth..!!! check out more abt this awesome company in company's preplacement talk... i bet this would be the best presentation u hve ever heard... !!

we had altogether 3 rounds
around 700 people appeared fr the test

1> WRITTEN TEST

Aptitude (19 Q) -- There were Prob. on Train, Time & Work and other simple problems.(Follow R.S.Aggarwal - Quantitative)

English (30 Q) -- Five paragraphs ... three of them are very long ... simple but very time consuming.

Reasoning (41 Q) -- There ware Qs from Data Sufficiency, Blood Relations, Puzzles, Binary Series .. Coding Decoding .. etc.(Follow R.S.Aggarwal - Verbal-Nonverbal)

Time-90 mins

There will be sectional cut off .. so concentrate on all sections...in verbal section dont spend too much time on first two passages.. better move frm last...

2> GROUP DISCUSSION

This is the main elimination round...1 or 2 out of 10(group) cleared this...just follow the general GD rules and tricks to clear this round

some of the topics wre

"IS INDIA FACING REVERSE BRAIN DRAIN??"

"BRAIN DRAIN"

CRICKET WORLD CUP 2007"

*Dont panic much abt the topics given.. just stay cool.. n speak boldly what u knw...

*Candidate who initiates and conludes the discussion will enjoy bonus points... so work out on this...

*Involve urself in discussion with group members rather than speaking to HR...

3> Technical & HR interview..

The best part of UST is u will be given full opportunity to explain abt urself..

For More Placement Papers visit www.123eng.com

- * Int usually starts with the question TELL ME ABT URSELF!!
- * If ur a non IT guy.. then make the best use of this question ... explain ur strengths and achievements....
- *For a non IT person there will be few basic questions on C programming... sometimes few simple apti n puzzle questions (General one. not frm any book!)
- *Technical questions will be asked on Area of Interest u mention... so prepare well for ur fav subject...n few questions on ur projects...

for me int lasted fr abt 50 mins....

HR personnel were very friendly.... that was the best part abt it!!! so stay cool and try to give ur best!! 28 members were selected out of 700 odd people who appeared!!

US TECHNOLOGY PAPER ON 19th MARCH AT KOLKATA

Hello friends! I am a student of 2nd year, MCA at Techno India - Hooghly, West Bengal.

Well on 19 march, 2007 ... I had a pool campus in BIT, Kolkata for US Technology.

The written exam was not so easy. there was 90 questions in 90 mins.

Aptitude (19 Q) -- There were Prob. on Train, Time & Work and other simple problems.(Follow R.S.Aggarwal - Quantitative)

English (30 Q) -- Five paragraphs ... three of them are very long ... simple but very time consuming.

Reasoning (41 Q) -- There ware Qs from Data Sufficiency, Blood Relations, Puzzles, Binary Series .. Coding Decoding .. etc.(Follow R.S.Aggarwal - Verbal-Nonverbal)

There was NO Negative marking ... I did it quite well. Probably the Cut off was not very high ... But there were individual cut off in every section.

Out of around 1000 students 375 were cleared the Aptitude round.

GD was made by making groups of 10 and a total of 38 groups were declared.

Some of the GD topics are:

- * Use of Mobile phones in college campus
- * Shahrukh Khan
- * Private life vs Professional life
- * Selection process for freshers in IT
- * Blood donation is necessary
- * Chocolate
- * Should Sourav Gangully be the captain of India after W Cup ?
- * Laptop or Desktop ?..etc

For More Placement Papers visit www.123eng.com

They some time gave few groups the freedom to suggest there GD topics too ... ! After the GD round 127 students was short-listed & asked to come next morning for Technical+HR.

In the Interview I faced the following questions --

- * Tell me something about yourself ?
- * Tell me something about your family back-ground ?
- * Which subjects do you studied in graduation ? (As I am a MCA student)
- * Why Comp. Sc / MCA ?
- * What is ur fav. sub. in MCA ? (I answered: C)
- * Why C ? (I explained from my point of view)
- * Write program in C to count the No. of words in a sentence ? (I had written the program in-front-of him)
- * What are ur future goals ? (I explained my short term & long term goals)
- * Do u have any Q ? (I asked about the training procedures in US Tech)

At the end .. out of 127 students 58 were selected ... and I was one of them.

It was made clear by them at the time result declaration that, 80% of their selection is made by looking at the Aptitude paper and then the GD performance. And the remaining process is a chance for the remaining 20% candidates to prove themselves.

US TECHNOLOGY PAPER ON 14th MARCH

hi frds, i hav got placed in US technology via TPC of our college..
placement procedure:

TEST:

very easy 1,jus do it with presence of mind,tats al,u shal get thr..
35/79 was shortlisted

GD:

its was also a vry comfortable GD,where they check ur confidance,zest, n ur communication skil,if u open the discussion they wont eliminate u i gues,so better try 2 start the discussion

22/35 again shortlisted frm this round

INTERVIEW:

its ws a HR + a bit of tech,but vry comfortable 1,i thk what tis comapny looks for is energy,confidance,passion
if u cn show tis u r in,tats al
BE cool and confidant

11/22 were finally selected from our college.

US TECHNOLOGY PAPER ON 19th FEBRUARY AT KERALA

Hello!!!!

I am in my sixth semester doing comp. science and engg. I attended the campus interview conducted in my coll. for US Tech. In the morning they came by about 9 45. One HR gave the ppt and our test began by 11 00. This time they had changed the pattern of questioning. Usually there are 32 ques in the first part but this time there were only 18.....

An overall view is that the first section contained 18 ques based on u r analytical reasoning. Then the next section 19-57 was the comprehension passage and some verbal reasoning. There were 5 passages ..big ones too...time consuming...

The last section consisted of logical reasoning(58-90). the test was for 90 min.

The results for aptitude were given by 1 30. there were 17 groups selected for gd.the gd was ok....they looked if u were confident in the points u were bringing in...,make sure an argument does not break...cuz those people r not selected.....then they give time for a few people to conclude.....it will be good if u conclude.....be an active member in the gd.....don't just start it and sit quiet.....if people r not giving u a chance then make a chance....don't be aggressive.....

some of the gd topics

- 1.black or white
- 2.bollywood or mollywood
- 3.should Abdul Kalam continue as president
- 4.should the capital be shifted from tvn to cochin
- 5.dress code
- 6.ragging
- 7.should trade unions be there in it companies
- 8.use of mobile phones

from a group of 8 they selected min of 4 and a max of 6. gd was over by 4 30pm. then i had to wait a long time for my interview.....cuz they had shortlisted 78 from gd....my interview was around 8 00pm. there r different types of interviews...i mean 3 were taken in simultaneously and three diff people interviewed. Some had just HR...and some had deep tech ques. i had tech ques and HR....but the atmosphere was cool....and tension free....technical will be asked if u r comp scienc....then know u r c and c++ very well.....also asked about threads and all.....

the result was announced by 10 30.pm.. 40 of us frm campus were selected.

US TECHNOLOGY PAPER ON 08th FEBRUARY AT NOIDA

Hi US TECH came to IIIT noida on 8th feb 07

The criteria was 63% and no 10th and 12th there will be a apti paper of duration 1hr.. and will comprise of 3 section

Section 1: Ques on data sufficiency

Ques on time and work, boat and stream, profit and loss(succesive discount were given have to calculate the overall discount

Section 2: English long passages....

total 4 passages were dere.. out of dem 2 were very short and two were long passages of about 1 and 1/2 pages. try attemptin 1 big passage and 1 small first and if time go for the others

Section 3: Ques frm puzzle test (r.s aggarwal non verbal)

go thru the logic chapter of r.s aggarwal non verbal its imp was asked in infy also. ques frm codin decodin

2 ques on series were given that 2 binary.....like(1,100,110,1000,1001,1010..)

Ques of rank type like (ramesh rank 5th in class frm top and 23rd from bottom so how many students)

There was individual cut for every section so try attemptin all d section..

After test 158 were shortlisted for GD Mind it GD round was (main)eliminating round topics were easy...

like reservation,beauty vs brain, internet...and all moreover dey allowed us to select the topic also

Out of 158 jus 47 were selected for interview.

interview was tech cum hr

dey asked about ur key skills and will ask from that only interview was easy....but be confident and prepare technical for cse ppl. even ece ppl should know bout dere subjects

finally 36 got selected.

and remember ur marks are carry fwd i.e everythin matters at the end ur written score+gd+interview..

best of luck

Siddharth Dwivedi

US TECHNOLOGY PAPER ON 6th FEBRUARY

hi, I m shivani from SCRIET, meerut (CS branch).. I hd given my off campus interview for US tech on 6th feb,07..

The whole test consisted of three rounds

- 1. Apptitude**
- 2.GD and lastly**
- 3.interview**

Apptitude basically consisted of 90 questions.. 10 of maths.. tough for me, 30 on comprehension (was quite lengthy) & 50 on logical reasoning(like series,relations,age etc.) although people advise for RS Aggarwal but frankly speaking i didnt refer any book for this appti.. i got selected for the next round luckily

for gd, very general topics are asked.. actually we had ppt firstly i.e a representative of that company who wud b briefing us bout his company.. there he had asked ques from us tht "How do you differentiate b/n a JOB n CAREER"? and tht was our GD topic.. it was for 10 mins with 10 people.. as our discussion was not healthy in this topic

so we were given another topic in the midst, "IS MBA REQUIRED OR NOT"... always remember to speak valid points rather than shouting n suppresing somebody's voice.. but remeber to speak it confidently bcoz even if u say sumthng wrong nobody is gonna kick u out

again God was kind enough.. got cleared wth this round as well. Lastly was interview.. more of HR & the simplest out of all rounds Initaly he made me comfortable talking to him.. as his ascent was kerala types.. then he started asking me bout which subject i m comfortable with.. from B.tech and which language

i mentioned tht i m comfortable with C/C++..
then he started asking very simple questions like various data strucures used?
wht's d difference b/n linked list n stack?
wht is multiple inheritance?
wht r d features of OOPs?etc..

lastly he asked me a logical ques which was.. if 3-4 frnds of urs including u r sitting in a boat n u all r in a very small pool.. n suddenly we encounter tht we r getting drowned.. n after sumtime we r completely drowned... wht will be rise of water level.. wil it increase, decrease or remain same

i replied tht acc 2 me it wud remain same applying Archimedes principle..
i think my answer was wrong bcoz he said think over it it's ur homework..

thn he asked me if suppose i m gud at sum langauge say Java n 2morrow sumbody comes to me n says he has to make his project in cobol.. wht wud i do..

aftr taking few mins for thinking, i replied Sir i wud like to convince tht person tht i wud make tht project in Java with all his spedifications n even if he doesnt get convinced by tht thn obvously i wud go for this language as there lies no probs in learning new language as job is a job..

thn he asked me if i send u Trivandrum, wud u b able 2 adjust there(i got a hint tht i m 99% selected)... and i finally cleared my interview either.. it lasted for(15-20 mins)..

so in short i can say it was simple one.. but wht is more imp is tht confidence works.. n the way u interact

US. TECHNOLOGY PAPER ON 5th FEBRUARY AT MEERUT

HI!! I am GAURAV TYAGI from BHARAT INSTITUTE of TECHNOLOGY, Meerut. U.S.Technologies is one of the most easy company to crack.

The selection Procedure comprises of **PPT, Aptitude, and Group Discussion & Final Interview.**

The PPT comprises of company introduction, company policies & companies Expectations. Listen to the PPT carefully. The process took around 2 days since the test started a bit late b'coz their Flight got Delayed.

The aptitude and G.D. took place on 5 February while the Interview took place on 6 February. Finally the result was announced and I was the lucky one to get selected in the lucky 12 out of 200 students. APTITUDE: It is Really Difficult. It comprises of 90 Questions. Its IMPOSSIBLE to do all the question since the Time allotted is only 60 Minutes. Just try to do as much possible in 60 minutes. You can also take guess since there is no negative marking. The question comprises of 3 sections. Quant, comprehension & logical. BEWARE-There is sectional cutoff. Quantitative comprises of various question. Good practice of R.S.Aggarwal is more than enough. Try answering as much question as possible. But do divide your Time Proportionally. Comprehension comprises of extremely long paragraphs, which are of really high level. BARRONS-GRE book is good enough for that. Try to read the Question first and then find the suitable answer in paragraph rather reading the whole paragraphs.

Logical question are fewer in number but do require a lot of thinking. I had marked around 72 questions out of 90. GROUP DISCUSSION: This round is to check your Public Speaking skills. The Topics given are very common and easy. If you are a regular newspaper reader or news listeners then you are surely going to have good amount of matter to speak. Don't shout in G.D. Try speak your point fluently. Fluency impresses the invigilator. The Topic given to my group was "Reservation in Professional colleges." I gave around 5 points and I was in for interview.

FIANL INTERVIEW: Interview is usually taken by H.R.People. H.R.People are really cool. They talk very calmly. Just try to compose yourself .Don't overexcite yourself. There are through technical questions for Computer science, I.T. student but for MECHANICAL, Electrical, EC the interview is mainly focused on H.R. Questions. I am telling mine experience in the interview----- Knock-Knock,
"Sir, Please may I come in?"

H.R.: Ya sure .Please have a seat. (Pause) Well GAURAV, tell me something about yourself?

G.T: Life comprises of challenges, so let's face some challenges- this is the Motto of my life. (such motto do impress people) My name is GAURAV TYAGI, I am from MEERUT. Presently I am doing my Bachelors of Technology from Bharat Institute of Technology, Meerut affiliated to UPTU, Lucknow. I have done my schooling from St.Mary's Academy, Meerut affiliated To ICSE & ISCE Boards. My hobbies are Event Management and Internet surfing.

H.R: Your hobby is event management. Well state me an incident when you Faced a Problem in it and how you faced it?

G.T: Well sir during my school days, we were giving a farewell to seniors, But the D.J.didn 't turned up. So we hurriedly went to one of my Friends' house, borrowed His computer. Went to the market hired 4 Speakers of 5000 watts PMPO. Arranged The setup and a lot of sound Could me prepare and thus the problem got solved.

H.R: Tell me about the laws of thermodynamics. (Although he never knew About T.D. (But he was trying out my confidence level.)

G.T.: I fluently described the laws of thermodynamics. There word entropy Came

H.R.: What is Entropy?

G.T :I Described Entropy.

H.R: What's Specific Enthalpy..... After that he asked the Formula of FORMAL DEHYDE, one small puzzle of measuring 4 liters of water with 5Litres and 3Litres jars. , Finally he asked me why I want to join U.S.Technologies. One sure shot Question—
H.R.: What do you wanna know about U.S.Technologies?

G.T.: what's CMM Level 5 Company? He gave me the full description of CMM Level 5 After that I asked what's the difference between CMM level 5 and ISO? So do prepare something different to ask them.

Thus mine sincere Advice to all of you is just be cool and answer the questions with full Confidence and with proper eye contact with the interviewer . Don't be hopeless. If you don't know anything just say NO, that too CONFIDENTLY. If you do everything confidently then all you need is just a little bit of luck. An advice to C.S.,I.T. students – concentrate on your basics since they are Going to GRILL you. Read DATABASE, DBMS, Software Models, Also clearly understand your projects and trainings.

US TECHNOLOGY PAPER ON 30th JANUARY AT HARYANA

hi i attended the placement test of U.S technology at rohtak haryana on 30-31 jan 2007

there were 3 stages

1: Written test included 3 sections

REASONING

QUANT

VERBAL ABILITY

duration of test 1hr 90 ques were there there was individual sectional CUT-OFF IN EACH

reasoning and quant were easy but verbal had 6 PASSAGES VERY LENGTHY BUT NOT DIFFICULT TEST WAS EASY ONLY TIME WAS THE PROBLEM

2.G.D WAS IN GROUPS OF 10 TOPICS WERE

SUNDAY OR MONDAY

BLACK AND WHITE

FORMAL DRESSING

SHOULD SOFTWARE PROFESSIONALS BE PAID HIGH SALARIES ETC.

3 INTERVIEW

GENERAL QUES LIKE DESCRIBE URSELF UR STRENGTHS AND WEAKNESS ETC

I GOT SELECTED

WISH U ALL THE BEST
